

Building Strategies for a Brighter Future

Stratem Consulting believes in transformation, and together, we will achieve the impact you envision. The step-by-step process we will embark on is grounded in change theory and based on strategies that help you maximize your impact while making the most of your investment. Specifically, this effort will include:

- Exploring the soundness and efficacy of your mission, vision, values, and principles as a foundation for enhancing the impact of the program.
- Identifying the internal strengths and improvements and external opportunities and challenges for successfully achieving your vision.
- Identifying and prioritizing your strategic goals, ensuring alignment with principles and within the scope of the internal/external analysis.
- Identifying key objectives for reaching your strategic goals.
- Developing a strategic plan for achieving goals and objectives, identifying key results and, if desired, an action plan for implementation.

Step-by-Step Process for Transformation

- Explore community needs, current services, and how they are meeting needs.
- Facilitate visioning exercises.

Imagine Your Possibilities

- Facilitate impact strategy dialogue.
- Draft impact strategy, including prioritized goals, objectives, and key results.

Design Your Strategy

- Provide implementation plan template.
- Facilitate the leadership team as it creates the implementation plan.

Implement Your Strategy

- Celebrate the achievements that we have made together on our journey.

Impact Your Community

Working With Me

Motivated by organizing change, I will help you create solutions to maximize your impact and transform the lives of the people you serve. I am the founder and owner of Stratem Consulting and a citizen of the Cherokee Nation. I serve as a strategic advisor guiding executives and social change leaders toward maximizing their impact. My focus lies primarily in strategic change, leadership, and performance development. I have decades of experience that directly relates to the work of this project, serving Tribes and Tribal organizations for nearly two decades and working towards improving early care and education programs for almost ten years. These experiences have given me in-depth knowledge of the intricacies of Tribal governance, Federal programming, and the field of child development and family services.
